

goNicaragua Project Objectives

The main objective of this project is to serve and give support to all those people who want tour the various places of Nicaragua, offering three types of services:

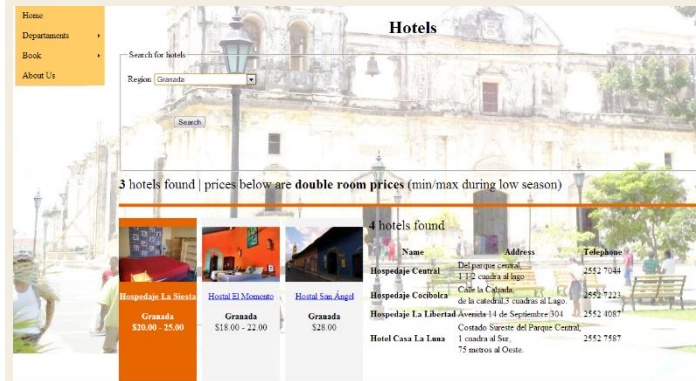

1-General Information:

- We describe the history behind each city, as well as information like the types of climate, location, and other aspects such as, ecotourism activities and events taking place in Nicaragua.
- Furthermore, we show the types of food that people can be delighted with in each region, tourist destinations and others.

2-Hotel Booking:

- Today in Nicaragua there are few websites that have reservation services, making it more difficult for tourists looking for places where you can stay during your stay in different cities and towns.
- This initiative is a very important service to the not only aim to help tourists to find places to stay, but also to help the website to serve all those hostels and hotels that do not have the ability to make their own website.
- Now this is a big problem, as many small and medium B2B lack the necessary means to promote their services on their own.
- In Nicaragua, hotels are one of the greatest economic power in capital (Holiday Inn, Crowne Plaza, Simone, etc.). The rest of the country's hotels and inns are homes between 10-13 rooms. Many times tourists have to walk long distances in search of these places.

3-Search:

- We have also added to this website a search engine that will allow tourists to access an easy search of directions, as in Nicaragua (as in much Latin American countries) the local population uses benchmarks which are not very efficient for tourists because they tend to get lost easily.
- On the other hand there is the problem of being able to communicate with people, who are mostly unable to speak a second language (e.g. English), making it more difficult for tourists to move around.

What kind of adventure are you looking for?

Nicaragua offers new and exciting adventures to visit the land of lakes and volcanoes. From jumping from an airplane to sliding downhill 500mts from the slope of a volcano, Nicaragua moreover offers great international events such as fishing tournaments, championships surf, etc. Among new attractions to be found in Nicaragua stands Guacalito Island, one of the largest hotel and tourism investment in the country.

Why Nicaragua can be your next stop?

The New York Times, one of the most prestigious newspapers from USA, gave to Nicaragua the third position as one of the best places around the world over the past several years. Various publications have declared the country the next great destination. However, if the booming eco-lodge business is any indication, Nicaragua's moment might finally have arrived. In and around the coastal towns of San Juan del Sur and Maderas, new lodges like the Aqua Wellness Resort, the high-end (and soon-to-open) Mukul Resort and Jicaró Island Eco-Lodge are cropping up near old-time eco-lodges, like Morgan's Rock Hacienda and Eco-Lodge. The food scene is getting a high-end makeover as well, with top chefs opening restaurants. The most exciting ones — El Segundo, La Casserole, Ciudad Lounge and La Finca y El Mar — are proof that Nicaragua is becoming an impressive food destination in its own.

Skydiving >>>

Imagine if you can be at 13,000 ft (3,962 m) altitude, feeling your heart beating twice faster and the over produced adrenaline is the one that controls your brain and tells to your muscles to jump into the void with a parachute in the back. That is "skydiving" and Nicaragua will lodge for 10 days around 200 international experts in this sport prepared for making never seen moves in the country.

Cerro Negro snorkeling >>>

One of the volcano's slopes is too steep to climb – but consequently great for a fast descent! Instead of large rocks this side only has volcanic sand, providing a great surface for running downhill. This thrilling experience takes less than ten minutes before reaching the bottom, but for the less athletic hikers it is also possible to walk more slowly while again enjoying the superb views.

Boarding >>>

Alternatively, experienced snow- or sand boarders can use a wooden board to go downhill, much like snowboarding down a mountain but now on a volcanic slope! In any way, the Cerro Negro provides a unique and intense experience that can be enjoyed by anybody in a fair shape.

Guacalito >>>

A tropical paradise for those in search of the exotic and undiscovered, Guacalito de la Isla's rolling oceanfront land reaches into the sea like two outstretched arms, calming the Pacific waters and extending a warm welcome to enjoy the many benefits and activities of four private beaches. Those in search of five-star design and amenities in direct connection with nature call the land at Guacalito de la Isla home.

Nicaraguan Destinations >>>

In the south: Playa Maderas, Playa Hermosa and Playa Colorado are noted for their beautiful waves for surfers.

Reserva Natural Laguna de Apoyo, Masaya Volcano National Park and upward Tiscapa are some of the highlights that stand out.

Nicaragua among the best destinations to visit in 2013

Climbing the Concepción volcano, on the island of Ometepe, and navigate on the San Juan River, are two activities that attract tourists to Nicaragua and placed among the top 10 destinations in the world to visit in 2014.
